

**Power Distribution Products**

**ReFlex Plus IEC**

**£600**

High performance mains distribution block with cryogenic treatment. Housed in a highly mechanically isolated acrylic case. To allow optimal choice of power lead for the application, the block is equipped with an IEC socket.

**ReFlex 'Lite'**

**£500**

High performance mains distribution block as per ReFlex Plus, but with more basic wiring and no cryogenic treatment. Complete with 1.8m captive mains lead.

**ReFlex 'Lite' IEC**

**£450**

A ReFlex 'Lite' mains distribution block, but with an IEC connector (no captive mains lead). Allows the user the flexibility to optimise the mains lead for their system.

**ReVive Power Lead**

**£750**

A highly tuned compound power lead with cryogenic treatment, and featuring the top of the range Furutech FI50 Rhodium IEC plug, and UK 13Amp Rhodium plated mains plug. 1.8m.

**ReVive 'Lite' Power Lead**

**£350**

A highly tuned compound power lead. This lead has simplified wiring when compared to the ReVive lead above, and lacks the top of the range Furutech IEC plug. This lead does feature the latest Furutech 13Amp Rhodium plated mains plug. 1.8m.

**Isolation / Storage Products**

**ReVo 3 - 3 Tier Equipment Table**

**£1,300**

A revolutionary 100% acrylic equipment table capable of supporting 3 pieces of standard width equipment. Movable support brackets allow equipment to be optimally supported. The table is supplied as 35cm or 46cm deep.

**ReVo 3 'Lite' - 3 Tier Equipment Table**

**£775**

Having the same dimensions as the ReVo 3 table, the 'Lite' version is simplified to provide a significant degree of what the full version of the table achieves. Differences: 10mm panels, no centre bracket and stainless 10mm bolts in place of acrylic.

**ReInforce – 15mm Internal Panel**

**£300**

A full size bracket panel fitting between the front and back panels to provide additional structural support for ReVo3 & Lite tables.

**ReVo 2 - 2 Tier Equipment Table**

**£850**

A revolutionary 100% acrylic equipment table capable of supporting 2 pieces of standard width equipment. Movable support brackets allow equipment to be optimally supported.

**RePlica – Performance Speaker Stand**

**£850 (per pair)**

Designed to provide an optimal platform for high performance stand mount loudspeakers. The design of the stand is based on the ReVo table and takes the performance of acrylic speaker stands to a new level.

**ReSponse – Floorstanding Speaker Support**

**£260 (S) / £320 (L) (per pair)**

Designed to provide an optimal platform for high performance floorstanding loudspeakers. The design of the stand is based on the ReVo table and couples the speaker to it's environment in unique way. The standard support (S) is suitable for speakers with widths of up to 30cm. Larger speakers up to 40cm wide can be accommodated by the large version of the stand. Supplied with a 33cm cross spar as standard and 2 support brackets per speaker.

**ReSponse Support Brackets**

**£90 (S) / £110(L) / pair**

Additional isolation brackets for the ReSponse speaker support.

**ReJig 5 Isolator (Basic Plus)**

**£60**

A small equipment isolator. Suitable for use in isolating light (under 5kg) equipment from glass / wood / metal equipment tables or the floor. Particularly useful for isolating light CD players, pre amps, power distribution blocks and cable terminators (eg MIT speaker cable terminators). Comprises acrylic spacers and 5mm acrylic panels.

**ReJig 15 Isolator**

**£115**

equipment isolator. Similar to ReJig Basic Plus but with acrylic spacers and 15mm side panels.

A small

## MusicWorks Reference Dealers

*MusicWorks Reference dealers carry the majority of MusicWorks products on demonstration. More importantly, these dealers have an in depth knowledge of how MusicWorks products individually and in combination can be applied to bring out the potential performance of any music playing system.*
