It's Showtime

We are delighted to be part of the North West Audio Show at Cranage Hall in two weeks time. We plan on showing a system comprising a Vertere turntable with the remarkable CH Precision phono stage, the new Lumin U2 streaming transport, an Accuphase DP-750 CD player and a selection of Accuphase amplification.

Loudspeakers are to be confirmed.

We will of course be using a MusicWorks power distribution loom, MusicWorks isolation products, and Audiomica cabling.

Demonstrations of the effects of isolation using th MusicWorks' wonder material, AcouPlex, will be performed!!

See us in Einstein

Loudspeaker News

Fyne Audio Classic Range

When Dave from Fyne brought in the new (despite appearances!) Classic VIII loudspeaker, we told him, it doesn't matter how good they sound, we have enough speakers.

He left with an order for a pair for demonstration.

We thought their appearance might work against these amazing speakers, and we know for some it definitely will, but we are about musical performance, and by the end of the week we had sold our first pair.

We now have the Classic VIII and the Classic X on permanent demonstration. At £4,499 and £6,499 per pair, these speakers are not cheap, but in the right system, they will bring phenomenal musical rewards.

For a speaker that oozes musicality, we have heard no bigger bargain.

Streaming with the new Lumin U2

Four years ago we played the Lumin X1 at the Cranage show, and we were knocked out by how good streaming COULD sound. This is their all in one player at over £10,000. We now have the brand new Lumin U2 Streaming transport on demonstration at less than half the price of the X1 (£4,499) , with new advances in hardware, and the optical network interface that we found added an extra dimension to the sound streaming the X1 could achieve. The U2 does not include a DAC, but with so many customers with a great CD player with DAC access, a stand alone DAC, or a DAC built in to their amplification, this will provide a high end musical streaming solution that a lot of people have been looking for.

Audiolab Electronics

We would like to introduce the latest manufacturer of products available at our store. Two products now on demonstration are the Audiolab 6000CDT (£399) and 7000CDT (£549). These are our new entry level transports from a company that has been around since 1983.

The transports have very much impressed us and are a great addition to the other brands we stock. The transports provide digital output and so can be matched to Audiolabs own DAC (digital to analogue converter) range, or DACs and amps from other manufacturers. So if you're thinking of buying yourself a cd player visit us for a demonstration our new Audiolab range.

We also have on demo the two amps in the 6000/7000 range to complement the transports.

Rega Eco Turntables & 50th Anniversary Product

[Subscribe](#)[Past Issues](#)[Translate ▼](#)

Rega have been busy. Saving the planet.

Well, not quite, but in a cute way, helping. For a limited time Planar 1 (in various finishes) will be available at a saving of £100, providing you don't mind very slightly wonky product. Small defects in plinths, which would have ended up in the big skip, are being made into product giving full P1 (and sometimes better!) performance. These turntables are in stock, in various finishes, for the bargain price of £199. Hurry.

For more information on the Eco P1 click the link below.

[Rega Eco P1](#)

Also hurry, because they will only be available this year, if you would like to own a Rega Planar 3 50th anniversary model. Offering higher performance than a conventional Planar 3, this turntable definitely will become a collectors item and is £899, ready to go. On demonstration and in stock.
